In the Mineralogical Museum in Szklarska Poręba, you can see nearly 4000 exhibits: minerals and fossils from around the world, as well as one exhibit from space – the Gibeon meteorite. In front of the museum, there is "CARBONIFEROUS FOREST" (the only one in Europe). There are fossilized trunks of the Dadoxylon tree, which grew here about 300 million years ago. A separate section of the museum is characterized by fossils and skeletons of dinosaurs. This is Poland's largest private collection of reptiles from before millions of years and an exhibition of models of retro cars "From the first automotive to the present day". The Museum has a regional souvenir shop, minerals and jewelry.

Opening hours:

During the season, it is open every day from 10:00 to 18:00, off-season from Tuesday to Sunday from 10:00 to 18:00, Mondays closed

The "Podgórze" mine in Kowary is the second largest uranium mine in Poland. The tourist route located in this mine runs through the drift 19a, which was created in the 1950s. This is one of the most interesting and the most beautiful buildings in Kowary. Our underground is a place, where history, science and curiosities from the old days will enable you to penetrate into the diligently hidden story of PRL. We reach the tradition, facts from the past and the stories of our grandparents.

When walking along forest paths, you can discover fairy-tale huts – each of them tells a different story. You can see fairy tales as: "Snow Queen", "Thumbelina", "Hansel and Gretel", "Rapunzel" and "Pinocchio". At each of them, children can develop their imagination by listening to a fairy tale read by the narrator and admiring the moving staging in a hut.
